

Power. With Control.

Q Acoustics 3030i stereo speakers.

Using the award-winning 3000i range as a baseline, the new 3030i delivers bass punch and presence that's normally beyond a speaker of this type. Add in an effortlessly articulate mid-range, smoothly crisp high frequencies plus class-leading build and finish, and the result is a speaker that looks and sounds much more expensive than it actually is.

Discreet, elegant looks. Powerful, full-scale performance without the premium price. The 3030i is Q Acoustics' latest demonstration of the art of the possible.

3030i is available in the following finishes:

Carbon Black

English Walnut

Graphite Grey

Arctic White
